

## El Dorado Irrigation District

### Project Update: Folsom Lake Intake Improvements Project scheduled to begin in summer 2020

---

EID is providing this courtesy notification for the Folsom Lake Intake Improvements Project located at the end of Planeta Way. The Project was anticipated to begin in the summer/fall of 2019. Construction activities are now expected to commence in the summer of 2020 and continue through March of 2022. These dates are estimates and the Project schedule may be influenced due to numerous factors including funding, contractor availability, weather, reservoir elevations, and completion of permitting processes.

The Project involves improvements to, and the replacement of, existing facilities associated with the water intake where water is diverted from Folsom Lake for delivery to EID's drinking water system in El Dorado Hills. A new intake consisting of stainless steel casings with temperature control withdrawal capability and new pumps will be installed along with other electrical and site modifications. For more information about this project, please visit the [www.eid.org/FolsomLakeIntakeProject](http://www.eid.org/FolsomLakeIntakeProject)

If you have questions regarding the project, or this notice, please contact us at [FLIntake@eid.org](mailto:FLIntake@eid.org) or, call (530) 622-4513 and ask for a representative for the Folsom Lake Intake Improvements Project.
