Neighbor  
Address  
Town, CA Zip Code

Dear Neighbor:

El Dorado Irrigation District (District) is providing this courtesy notice to inform our neighbors about the Reservoir 1 Liner and Cover Replacement Project (Project), located at the Reservoir 1 Water Treatment Plant on Gilmore Road in Pollock Pines. The Project includes replacing the drinking water reservoir's liner and cover. The existing cover has been in operation since 1989 and must be replaced to maintain drinking water standards. All work for the Project will occur at the District's Reservoir 1 Water Treatment Plant site. The Project is scheduled to begin in December 2025 and is anticipated to take approximately five months to complete.

During construction, planned water outages will be required, and affected customers will be notified in advance. Due to the complexity of operating the system with temporary storage facilities during construction, unplanned outages may also occur. If an unplanned outage occurs, the District will notify affected customers as quickly as possible and work promptly to restore service. The District is actively taking steps to reduce the likelihood of unplanned outages and to ensure that the new facilities are fully operational before the peak demand season next summer.

Thank you for your support and understanding as we make necessary investments in our drinking water infrastructure. The District's system is extensive and requires ongoing rehabilitation and replacement as part of our improvement program. This work is vital to ensuring that the drinking water system that serves your community remains reliable.

If you have any questions or concerns related to this Project, please contact Senior Civil Engineer Daniel Goldman, P.E., at (530) 642-4103 or [dgoldman@eid.org](mailto:dgoldman@eid.org).

Sincerely,

A handwritten signature in black ink, appearing to read 'Daniel Goldman', written over a light blue horizontal line.
